JAWS THEMED PARK

In this we fix a boat to a ramp and it course will be preprogramed. 4 arms will be holding the boat

The top is fully covered with screens which appears like night sky and sprinkles system give a feel like rowing as they are attached above. Initially as the rides will be taken on by the ticket booking to the boat climbing the rope

are dark for people to adjust their eye sight. Initially after boat start, (Note that the boat operator turns his wheel like he is the one operating with engine noise whizzing with a crew member but all these are faked).

Suited where a boat is already capsized and an animal or arm suddenly pops up and tries to climb boat with calling of help and then in a brief moment yells and is pulled under immediately. Full body is not shown

just the head positioned in a way people can't see everything. Next the boat tilts by 5-7° sideways as jaws brushes itself with the boat. Then boat then continues forward like the driver tries to rescue and

suddenly the boat forward part lifts up by 15° like the shark ramped over and with the sound. and the boat drops. Boat speed is increased and erratic movements are taken. The shark rope now up then. Next all [illegible] and voice security

a story of the shed like how
ancestors where caught by it
and none could do anything and
someone is needed. with the side
screen going according to the
story or still fully pitch black
Next they return and
the shard hits the bow

from left and the boat tilt
towards left by 20°. While
the boat stabilizes the armstrong
hits and crashes armstrong
a third time on a heavier
armstrong yelling for help
near boat like a guy
went of from the boat

our staff but the work by
you boy miss and then it
dies and the end. This is for main
tank and next we have at entrance
a tank which is filled at night.
So it has dolphins like a
show (dolphin animation)

which runs for 30 minutes and then one is pulled into water by jaws dramatically and red light is also released with dramatic 'JAWS' written with light like Batman. This is a night show. Another nearby we have water with

fish which are there for fun..

Benefits:-

- Sprinkler system reuses water from some thing.
- Lawn can be minimized as it dark and can look peoples perception as they will get any inference

with poor visibility and chaos but gives an illusion of big.

- Due to darkness animatronics don't seems to be like fake is designed properly.

- As during night maintenance to be done the main lagoon is emptied to the dolphins bar

to other show so that engineers need not have fear while serving.

- During dry water is pumped back and dolphins are serviced.
- Fully controlled boats thus improved safety.

Challenges :-

- water filter.
- Extensive friction repair for the boat scraping against.
- & can be unsuitable for children and weak hearted ones.
- Expensive to make the full screen.

Safety :-

- 3 point seatbelt and if seated removed even in one seat the show immediately stops and wheels turns to full daylight as it like nighttime and we can't take rights but still remain

in case of emergency :

- Rail guards.
